The Trainer is a one-time usage thing only. It's never going to work again if you reinstall the game. FAQ: Q: I need a Help file! A: Use the in-game help. If you can't find any answers with the in-game help, then this is what you need. Q: Why is this trainer better than the official one? A: This trainer supports the latest version of the game and the official one doesn't. I just don't want to support obsolete material, do I? Q: How do I know this trainer is working? A: Put in the CD-Key and let it install the trainer. After it's finished, you will be able to install the game. Then start the game, go to the Options menu and click on the Play button. Put in the CD-Key and let the game play. If you're playing on Xbox, you will have to do this on the Xbox Live console. Make sure you have Live Gold or whatever the equivalent is for the Xbox version. In any case, if you can't find a game that requires the Live service, just do a system restore. Q: Can I use this trainer on any version of the game? A: I only support the full game with all DLC, online and offline modes. Q: Why is my game not working? A: Check the installation. If everything was correctly installed, make sure the Steam Client is running in the background. If this is not the case, then run Steam from the Start Menu. Q: Will this work for PC? A: Yes, but I have yet to test it. Q: How can I contact you? A: If you want to contact me, I'm at messi100@yahoo.es Q: Where do I go to ask questions? A: Go to the CryTribe Forums. You can find them at I am really looking forward to seeing this on the retail shelves. I'm actually starting to think about purchasing a retail copy of this game to give it a try and see if it works as advertised. Good job, Mr. Colombo. 1st problem I had was I found that my CD key didn't work, so I tried the alternate key on their site, and it works 82157476af
